Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-5, 11-13, and 15-16 are rejected under 35 U.S.C. 102(e) as being anticipated by Kim et al. (7,428,018).

Regarding claim 1, Kim discloses a controller (420), and a video processing unit (col. 5, lines 4-16).

Regarding claim 2, the scaler 410 meets the position and size adjustment as claimed (note col. 4, lines 62-65).

Regarding claim 3, note col. 5, lines 61-63.

Regarding claim 4, note col. 5, lines 34-36.

Regarding claim 5, in addition of above, Kim inherently includes two video processors or means for processing the first area and the second area (note col. 5, lines 16-22).

Regarding claims 11-13, and 15, in addition of corresponding rejections as set forth above, Kim further shows a setting step (col. 5, lines 4-16) and an outputting step (col. 5, lines 17-22).

Regarding claim 16, see col. 5, lines 45-49.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 6-10, 14, 17-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kim et al. (7,428,018).

Regarding claims 6-10, and 17-19, in addition of above rejections, Kim does not disclose that a plurality of full images, each with different picture quality, and a plurality of image parts, each also with different picture quality are selectively displayed on each of the display windows. In any event, in Figure 3, Kim teaches that two full size images are displayed on the same screen to facilitate different picture quality comparisons. Hence, in order to further enhance the picture quality comparing function, it would have been obvious to one of ordinary skill in the art at the time that the invention was made to include the full image display feature of Figure 3 into Kim to perform the well known functions as claimed.

Regarding claim 14, Kim does not specify the ratio setting step as claimed. Although Kim only shows two split screens, it would have been obvious to one of ordinary skill in the art to recognize that two screens could be in any different sizes or ratios as claimed. It would have been a matter obvious design choice.

Regarding claims 20 and 21, see col. 5, lines 45-49.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Bergquist (4,754,332) shows a plurality of images parts with different adjustments.
